

Update MultiRack-Compatible Plugins

Download the multi-platform V9 plugin installer:

Mac: <http://www.waves.com/dlrdr?id=latest-mac-online>

Windows: <http://www.waves.com/dlrdr?id=latest-win-online>

Launch the installer and choose your plugins or bundle from the list. Installed plugins support both Native and SoundGrid formats, depending on the licenses you have and on compatibility.

For the convenience of live users, you can choose to install all SoundGrid-compatible plugins at once by choosing “All SoundGrid-Compatible Plugins” from the menu.

Follow the steps to complete installation.
