Chapter 1 – Introduction

1.1 Welcome

Thank you for choosing Waves! In order to get the most out of your new Waves plugin, please take a moment to read this user guide.

To install software and manage your licenses, you need to have a free Waves account. Sign up at www.waves.com. With a Waves account you can keep track of your products, renew your Waves Update Plan, participate in bonus programs, and keep up to date with other important information.

We suggest that you become familiar with the Waves Support pages: www.waves.com/support. There are technical articles about installation, troubleshooting, specifications, and more. Plus, you’ll find company contact information and Waves Support news.

1.2 Product Overview

The Waves Artist Signature Series is our exclusive line of application-specific audio processors, created in collaboration with the world’s top producers, engineers, and mixing engineers. Every Signature Series plug-in has been precision-crafted to capture the artist’s distinct sound and production style. For experienced and aspiring audio professionals alike, the Waves Signature Series allows you to dial up the sound you’re looking for quickly, without interrupting the creative flow.

The CLA Artist Collection consists of six plug-ins, each of which is designed to handle a specific mixing task.

- CLA Vocals
- CLA Drums
- CLA Bass
- CLA Guitars
- CLA Unplugged
- CLA Effects
1.3 Concepts and Terminology

Sensitivity Control/Sensitivity LED

The Sensitivity LED’s 3 colors indicate when appropriate levels are reached:

- Led Off (too low)
- Green (good)
- Yellow (optimal)
- Red (very hot)

Push the Sensitivity Control upwards until the LED lights up. We recommend adjusting the Sensitivity Control as soon as you open the plug-in, using the section of your song with the highest peaks for best results.

In most cases, the Sensitivity LED indicates that your levels hit the processor in a way that will give you the intended output result. However, it’s important to keep in mind that optimal results for your source material may be achieved even when the Sensitivity LED does not display “optimal” levels (yellow). As always, trust your ears.

Color

Each fader on CLA Artist Signature Collection plug-ins controls a specific function, such as compression or reverb. Each function has a color-coded selector which controls the internal characteristics of that function, resulting in a different sound character or “Color.” You can mix and match different colors across the different faders.

1.4 A Few Words from CLA

"CLA Unplugged is a dream box of reverb effects plus great hi-res EQ and compression for complex sounds. I always loved the Aerosmith "Dream On" vocal reverb with the really long pre-delay. And I wanted a plug-in that you could also put on strings, piano, acoustic guitars, and nylon guitar solos. This plug-in was designed to give you limitless reverb and delay possibilities, and the smoothest EQ curve around."
1.5 Components

WaveShell technology enables us to split Waves processors into smaller plug-ins, which we call components. Having a choice of components for a particular processor gives you the flexibility to choose the configuration best suited to your material.

The Waves CLA Unplugged has two components:

- CLA Unplugged Mono-to-Stereo – Mono in to Stereo out component
- CLA Unplugged Stereo – Stereo in to Stereo out component
Chapter 2 – Quickstart Guide

- Insert the CLA Unplugged plug-in on an effects return track (aux bus), and turn off the Direct switch. You can also insert the CLA Unplugged on the source track, in which case you should turn the Direct switch on.
- Adjust the Sensitivity control until you achieve proper levels, as indicated by the Sensitivity LED and the input meter.
- The current plug-in setting now represents Chris's default effect setup.

Tweak the following controls to fit your mix:

- Adjust the Bass and Treble faders. Toggle through the Colors to find the EQ that works best for the song.
- Use Compress for dynamic range control. Toggle through the Colors to find that which works best for the song
- Adjust Reverb 1 level for the first Reverb layer. Toggle through the Colors to find that which works best for the song. Add pre-delay using the Pre-Delay 1 controls.
- Adjust Reverb 2 level for the second Reverb layer Toggle through the Colors to find that which works best for the song. Add pre-delay using the Pre-Delay 2 controls.
- Adjust the Delay effect level. Toggle through the Colors to find that which works best for the song.

Please note:

- When all Colors are set to clear (Bypass/Mute), some fixed processing as designed by Chris is still active.
- EQ adjustment will take effect once the EQ faders are moved. At zero, cycling through the EQ Colors will have no effect.
- All other faders are active and set to Chris's default setup when at zero.
- When Reverb 1, Reverb 2 and Delay are set to clear (Bypass/Mute), and Direct is off, the plug-in will have no output.
- Pre-Delay time controls are synced to the session BPM.
Chapter 3 – Interface and Controls

3.1 Interface
3.2 Controls

**Input Sensitivity** is used to achieve optimal plug-in input level.
- Range: +/- 10 (in 0.1 steps)
- Default: 0

**Input Meter** displays input signal peak level.
- Range: -26 to 0 dBFS

**Balance** adjusts the offset between left and right signals. *(Stereo component only)*
- Range: +/- 6 dB (in 0.1 steps)
- Default: 0

**Sensitivity LED** indicates the presence of proper levels.
Range: LED off (too low), Green (good), Yellow (optimal), Red (very hot)
Bass controls low frequency gain.  
   Range: +/- 10 (in 0.1 steps)  
   Default: 0

Bass Color toggles between low frequency filters.  
   Range: Clear (Bypass), Green (Sub), Blue (Lower), Red (Upper)  
   Default: Green (Sub)

Treble controls high frequency gain.  
   Range: +/- 10 (in 0.1 steps)  
   Default: 0

Treble Color toggles between high frequency filters.  
   Range: Clear (Bypass), Green (Bite), Blue (Top), Red (Roof)  
   Default: Green (Bite)
Compress controls the dynamic range.
Range: +/- 10 (in 0.1 steps)
Default: 0

Compress Color toggles between compression characters.
Range: Clear (Bypass), Green (Push), Blue (Spank), Red (Wall)
Default: Green (Push)

Reverb 1 controls reverb 1 wet mix
Range: +/- 10 (in 0.1 steps)
Default: 0

Reverb 1 Color toggles between reverb environments.
Range: Clear (Mute), Green (Room), Blue (Hall), Red (Chamber)
Default: Green (Room)
Pre Delay 1 controls the pre-delay timing of Reverb 1. *(Settings sync to the session BPM.)*
  - Range: 64T to 4 (1/64 Triplet to ¼ note)
  - Default: 16

Pre Delay 1 On turns Reverb 1 pre-delay on or off.
  - Range: On/Off
  - Default: Off

Reverb 2 controls Reverb 2 wet mix
  - Range: +/- 10 (in 0.1 steps)
  - Default: 0

Reverb 2 Color toggles between reverb environments.
  - Range: Clear (Mute), Green (Tight), Blue (Large), Red (Canyon)
  - Default: Green (Tight)
Pre Delay 2 controls the pre-delay timing of Reverb 2. *(Settings sync to the session BPM.)*
- Range: 64T to 4 (1/64 Triplet to 1/4 note)
- Default: 16

Pre Delay 2 On turns Reverb 2 pre-delay on or off.
- Range: On/Off
- Default: Off

Delay controls the delay wet mix.
- Range: +/- 10 (in 0.1 steps)
- Default: 0

Delay Color toggles between delay times and characters. *(Settings sync to the session BPM.)*
- Range: Clear (Mute), Green (Slap), Blue (Eight), Red (Quarter)
- Default: Green (Slap)
**Direct** controls unprocessed signal throughput, determining whether or not the dry signal is combined with the wet (processed) output.
In general, when using CLA Unplugged as an insert, Direct should be On; when used as an effects return, Direct should be Off.
Range: On, Off
Default: On

**Output** controls the output level.
Range: +/- 10 (in 0.1 steps)
Default: 0

**Clip LED** lights up when levels exceed 0 dBFS. Click inside the meter area to reset.

**Output Meter** displays output signal peak level.
Range: -26 to 0 dBFS

### 3.3 The WaveSystem Toolbar
Use the bar at the top of the plugin to save and load presets, compare settings, undo and redo steps, and resize the plugin. To learn more, click the icon at the upper-right corner of the window and open the WaveSystem Guide.
